TITLE : INFORMATION REPRODUCING
SYSTEM, POSITION MEASURING
SYSTEM, AND MOBILE DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To enable a user to reproduce and enjoy the same music or video source in his or her going out destination and in his or her home without bringing a recording medium from/to his or her home to/from a mobile device like on-vehicle equipment.

SOLUTION: A personal computer in the home is called from on-vehicle equipment to form a communication line of a telephone line. The on-vehicle equipment requests download of information stored in a storage means of the personal computer through the formed communication line. The personal computer transfers a list of information which can be provided, to the on-vehicle equipment in response to this download request. The on-vehicle equipment provides this list to the user and returns designation information of information selected from the list to the personal computer. The personal computer downloads designated information. The on-vehicle equipment may be provided with a function to upload information to the personal computer through the formed communication line.
